HD SERIES

HEAVY DUTY

**Strong, agile, high-performance.
Ready to perform in any conditions.**

Two platforms designed for the toughest jobs, which combine the great strength of the undercarriage with the maximum agility of the aerial part, composed of a single pantograph with a telescopic boom.

Thanks to their compact design, long outreach and articulated outriggers with high levelling capabilities, the HD series platforms are the undisputed leaders of the work in extreme conditions, with maximum operating working heights between 19m and 22m . They are able to operate in any condition and on any terrain and ensure maximum efficiency and safety, thanks to the Self Control System by CMC, an electronic system that automatically carries out most of the control and stabilisation operations.

S19HD

S22HD

BENEFITS

Easy to transport

Strong, but contained in weight, the CMC HD Series platforms are self-loading and easy to transport on a trailer. Thanks to their compact dimensions, they are also able to fit through a standard door.

Versatile to use

With their compact design, long lateral outreach, articulated outriggers with high levelling capability, and with the support of the automatic control system, the CMC HD Series platforms can reach anywhere and operate in all conditions.

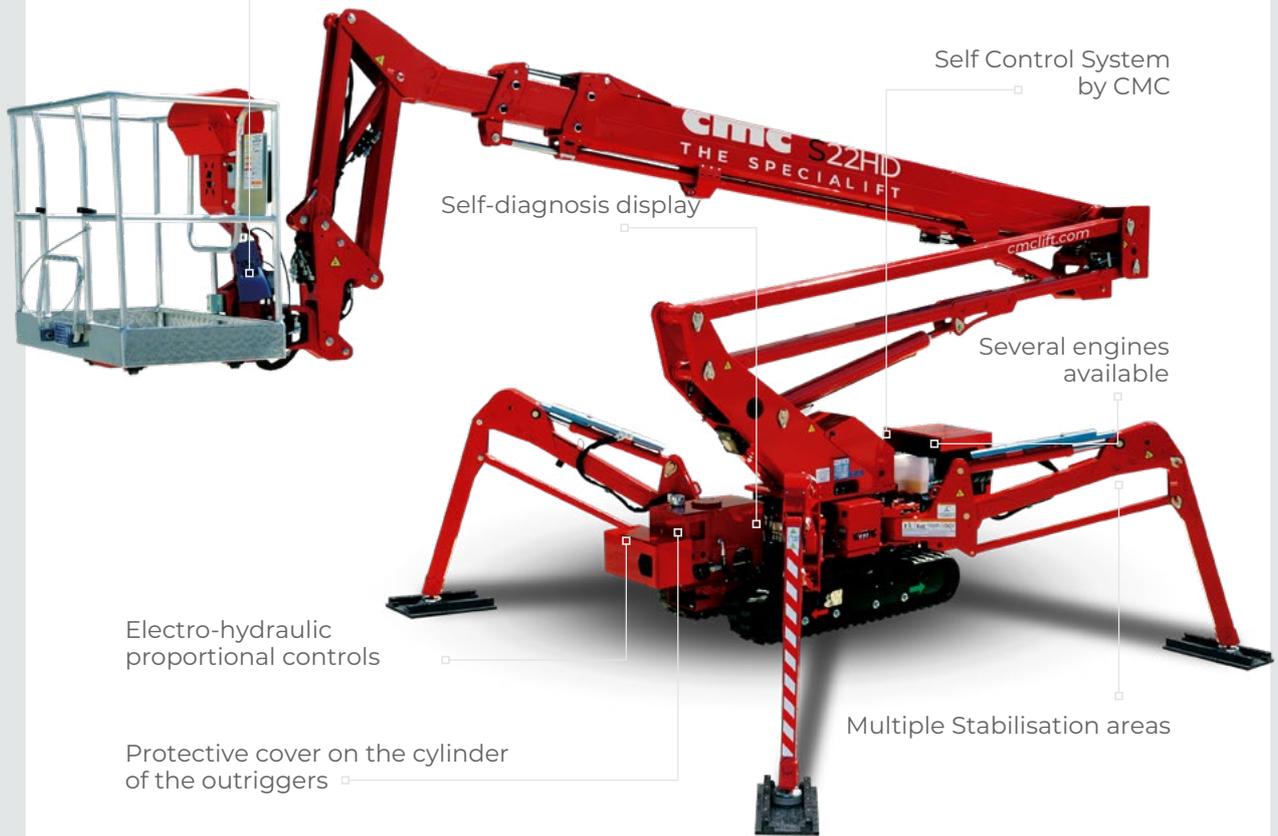

Simply to use

The HD series platforms are equipped with the Self Control System by CMC, an electronic system that automatically carries out a series of operations: outrigger levelling, boom's movements control, closing of the aerial part, and reporting of any malfunctions.

FEATURES

200 bar air/water hose and 230V and 12V socket in the basket

Radio remote control

Self Control System by CMC

Self-diagnosis display

Several engines available

Electro-hydraulic proportional controls

Protective cover on the cylinder of the outriggers

Multiple Stabilisation areas

Some available options

	S19HD	S22HD
Kubota Z602 diesel engine	●	●
Full lithium battery version (160Ah)	●	●
230V, 120V, 110V electric motor	●	●
Hydraulically adjustable undercarriage	●	●
Basket rotation (+90°/-87°)	●	●
Non-marking grey tracks	●	●
Double travel speed	●	●
1 or 2 man fibreglass basket	●	●
2 man basket with quick release system and wheels		●
Remote connection with Sim Card and GPS Locator	●	●
Customisable colours	●	●

CMC PLATFORMS APPLICATIONS

Refurbishment building works
even in places with difficult access
such as worship places, historical
buildings, hotels, and shopping
centres.

Facilities management
mainly in restricted traffic areas or in
locations that are difficult for
truck-mounted platforms.

Pruning tall trees
and even operating in tight spaces
inside private homes on particularly
delicate turf.

TECHNICAL DATA

PERFORMANCE AND DIMENSIONS

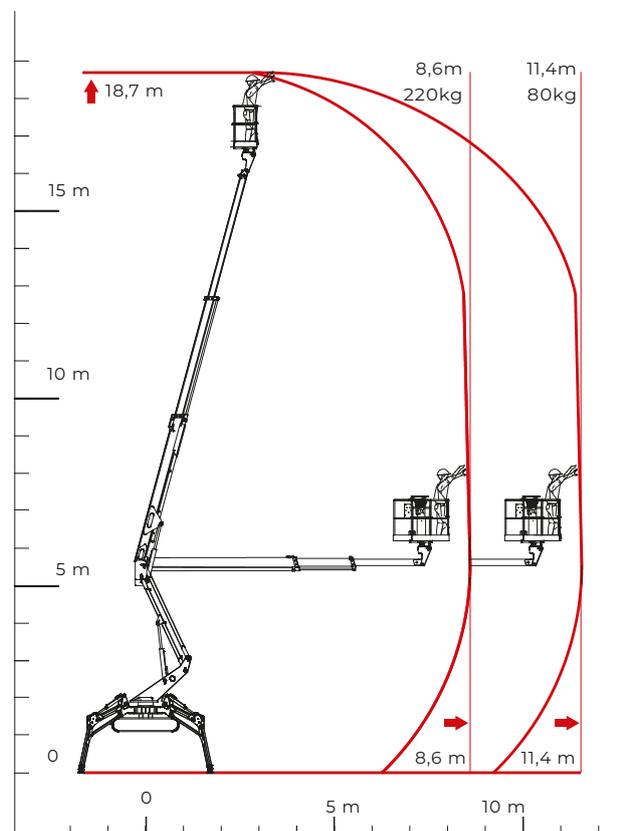

S19HD

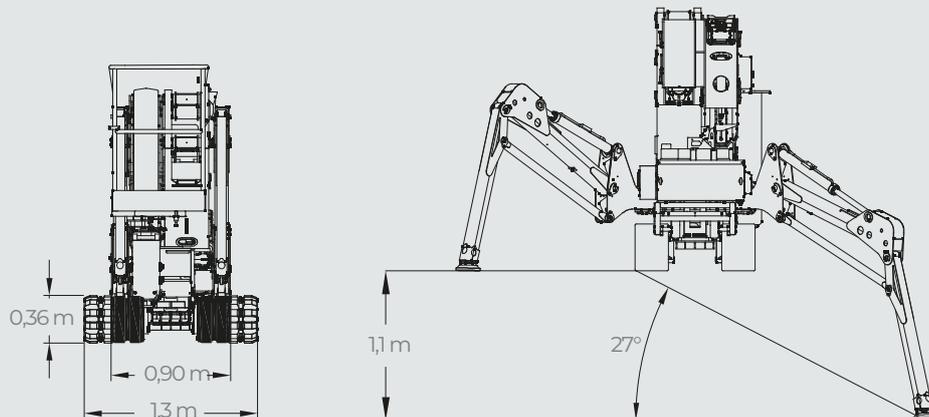

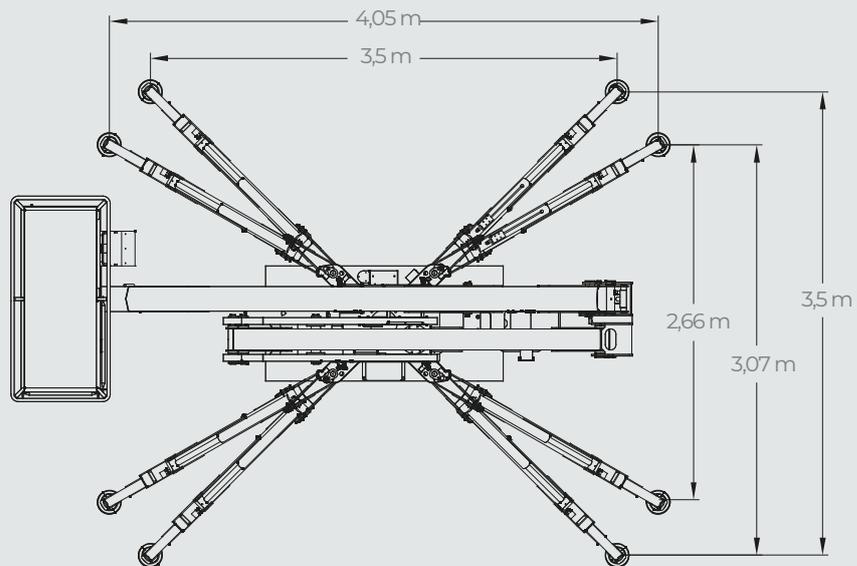

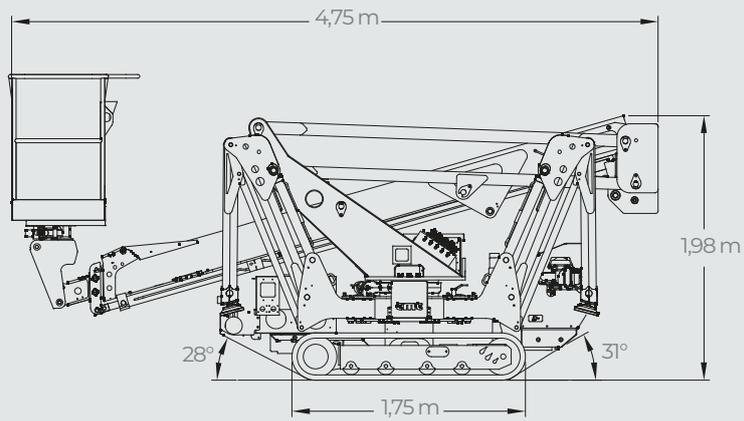

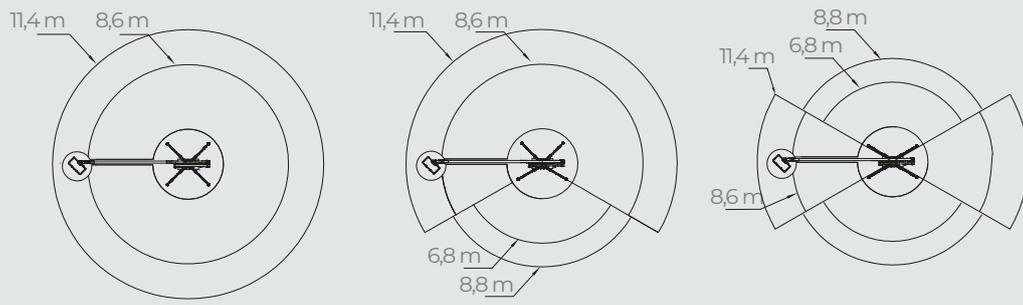

Main features

This articulated platform with pantograph and telescopic boom offers outstanding performance thanks to its outriggers of high levelling capacity. Designed for maximum work performance on the toughest terrain, it's an excellent alternative to a truck-mounted platform.

Max. working height	18,7 m
Max. outreach	11,4 m
Platform height	16,7 m
Max. load in basket	220 kg
Basket dimensions	1,4 x 0,7 x 1,1 m
Basket rotation	+90°/-87° (options)
Turret rotation	+/- 355° (710° continuous)
Total weight	2685 Kg

*data may can change due to updates of components

TECHNICAL DATA

PERFORMANCE AND DIMENSIONS

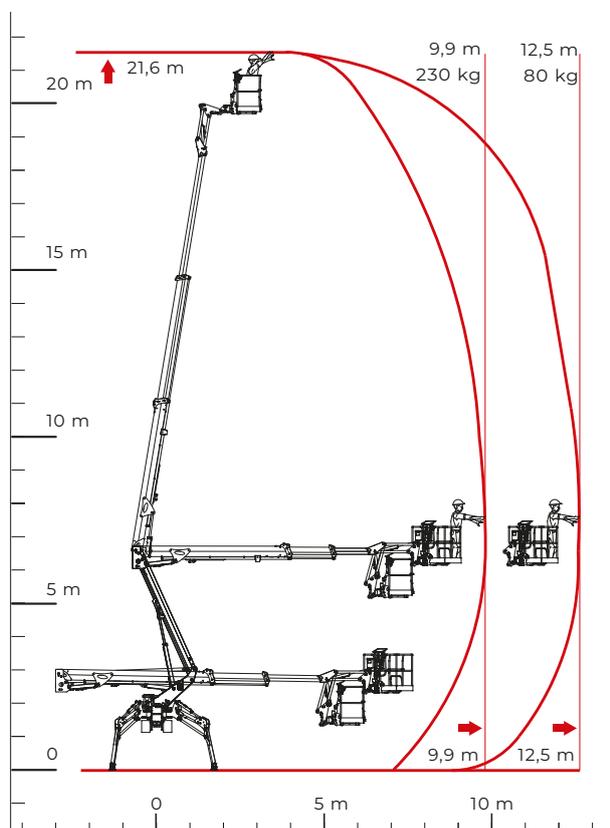

S22HD

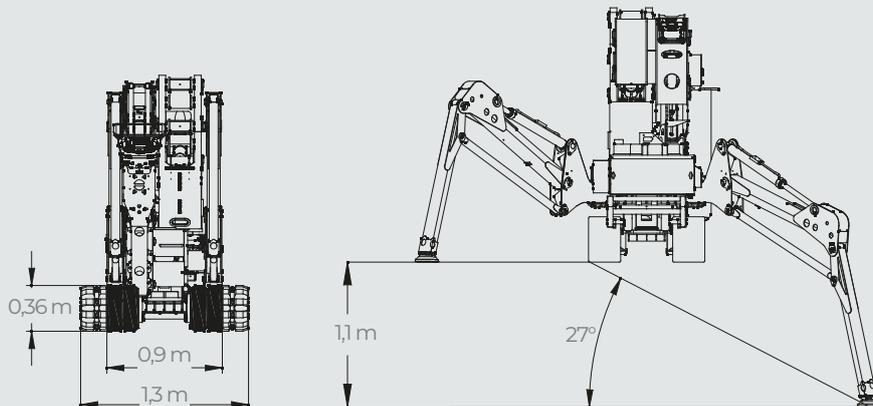

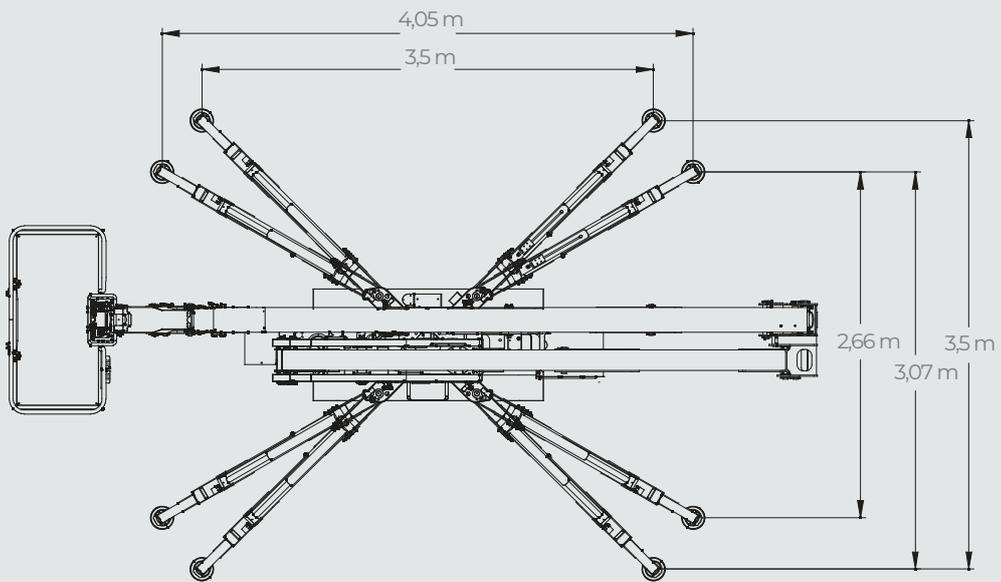

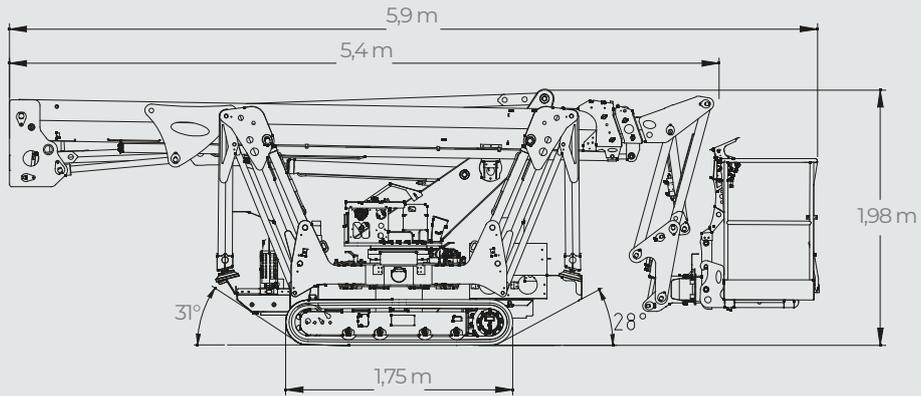

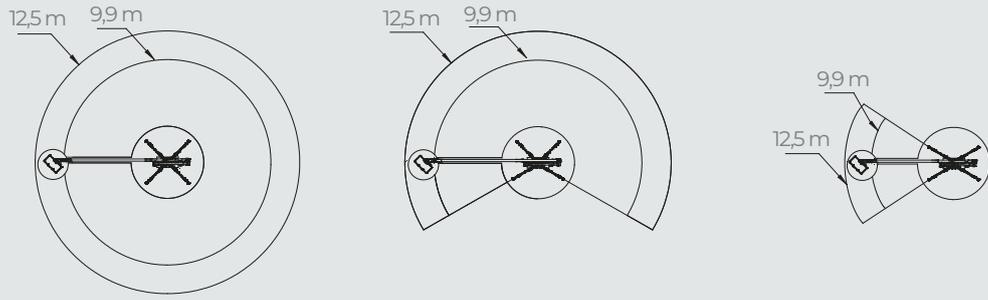

Main features

An articulated platform with a pantograph and a two-stage telescopic boom plus jib. This combination, together with its outriggers of high levelling capacity, three working areas and long horizontal outreach, makes it ideal for all outdoor works, even in extreme conditions.

Max. working height	21,6 m
Max. outreach	12,5 m
Platform height	19,6 m
Max. load in basket	230 kg
Basket dimensions	1,4 x 0,7 x 1,1 m
Basket rotation	+/- 90° (options)
Turret rotation	+/- 355° (710° continuous)
Total weigh	3025 Kg

*data may can change due to updates of components
